PROJECTS

CLAP SWITCH

In this Project, A Clap Switch project is an electronics project that allows users to control devices (like lights or fans) using sound claps, typically implemented using a microcontroller and a sound sensor.

SOLAR BASED HOME LIGHTING SYSTEM

A Solar-Based Home Lighting System project utilizes solar panels to harness renewable energy, storing it in batteries to power LED lights or other appliances in homes, promoting energy efficiency and sustainability.

SOLAR ENERGY BASED G2V AND V2G CHARGING INFRACTURE. (MATLAB)

A Solar Energy Based Grid-to-Vehicle (G2V) and Vehicle-to-Grid (V2G) Charging Infrastructure project integrates solar power with electric vehicle charging, enabling vehicles to charge from solar energy (G2V) and discharge back to the grid (V2G) when needed.
